

Assessing knowledge and attitudes about end of life: Evaluation of three instruments designed for adults with intellectual disability

Stancliffe, R. J.^{1a}

Wiese, M. Y.^{2a}

Read, S.³

Jeltes, G.⁴

Clayton, J. M.⁵

1 The University of Sydney, Centre for Disability Research and Policy, Australia

2 School of Social Sciences and Psychology, Western Sydney University, Australia

3 School of Nursing and Midwifery, Keele University, UK

4 Sunshine, Sydney, Australia

5 HammondCare Palliative and Supportive Care Service, Greenwich Hospital, Sydney, and The University of Sydney, Northern Clinical School, Australia

a Copies of the following instruments are available on request from the first two authors: End-of-Life Planning Scale (EOLPS) (Wiese, Stancliffe, Clayton, Read, & Jeltes, 2014), and the revised Collett-Lester Fear of Death Scale, version 3.0 - intellectual disability (FODS3.0-ID)

Keywords: intellectual disability, end of life, assessment, death, staff, planning, fear of death, questionnaire

Acknowledgements

This research was supported under the Australian Research Council's Linkage Projects scheme (Project number: LP130100300) with the assistance of a disability industry partner, Sunshine. The views expressed are those of the authors and are not necessarily those of the Australian Research Council or the industry partner.

Conflicts of interest: None of the authors had a conflict of interest.

Running title: End of life
